

CURRICULUM VITAE

QUALIFICATION/EXPERTISE

- Geological and reservoir characterization, planning-overview, and operational supports for production and explanatory wells incl. pilot, evaluation, vertical, geo-steering/highly deviated, cored, injector, extended reach, relief, multi-lateral and EOR wells
- Laboratory Geological Reservoir Characterization: Wide experience in the generation of geological reservoir models from multi-disciplinary data sets, specially integrating various analytical/laboratory, well and field data (thin section, SEM, XRD, wireline logs, core, petrophysical, seismic) for carbonates, clastics and basement/fractured reservoirs

WORK HISTORY

- 2006-2019 ARAMCO. Geological Specialist, based in Dhahran, Kingdom of Saudi Arabia. Responsibility to perform geological and reservoir characterization, planning, overview, and operational supports for 500+ drilled wells which included pilot, evaluation, vertical, geo-steering/highly deviated, cored, injector, extended reach, relief, multi-lateral and EOR wells. Responsibility to achieve the departmental objectives of the oil-field development and re-development of mainly onshore Ghawar complex, Saudi Arabia (i.e., the king of giant fields in the world, producing +/- 1 M barrel oil/day)
- 2006 KUFPEC. Chief Geologist of Kuwait Foreign Petroleum Exploration Company (KUFPEC) Indonesia Ltd, based in Jakarta. Responsibilities included monitoring and supervision on geological drilling operations, updating of exploration/geologic data liaison with government and partners, involvement in the farm-out
- 1999-2006 SCHLUMBERGER. Acted as Geology Group Head and later as Geological Champion, with DSC and Wireline segment, based in Jakarta. Responsibilities included technical, supervisory and consulting/education roles and marketing aspects as well. The technical aspects included geological/petrophysical studies based on a combination of borehole images, cores and other well data/logs for production and exploration purposes in oil/gas and geothermal fields
- 1986-1999 CORELAB. Had various positions as Petrologist, Sedimentologist, and then Supervisor Reservoir Group, based in Jakarta. Main technical responsibilities included to conduct reservoir geological studies based on laboratory data (thin section, SEM, XRD, core analyses) from single and multi-wells
- 1989: Guest Lecturer (1 semester), Department of Geology, University of Pakuan, Bogor
- 1986-1988: Part-Time Translator/Editor for two geological books
- 1985-1986 MUD LOGGER. Baroid/Sperry Sun, onshore and offshore rigs

PRESENTATIONS and PUBLICATIONS

Presented and/or published more than 20 technical papers in various professional forums, including IAGI, HAGI, SPE, AAPG, SPWLA, EAGE, FESI, and IPA. The topics range from diagenesis, applications/techniques of well data, porosity, sedimentary and facies, and field re-development

PERSONAL DATA

Name : SANGGAM HUTABARAT
Born : 09 March 1960
Current Position : Consulting Geologist
Education : Geology (ITB, BSc, 1985),
MBA (IIM, 1992),
Reservoir Geophysics (MSc, UI 2006)
E-mail : sanggam53@gmail.com
Home Address Marital Status : Jl. Kesehatan VB No. 52, Bintaro, Jakarta
